

A promotional banner for Brother Printer Support. On the left, a woman with long brown hair wearing a headset smiles while holding a phone to her ear. In the center, the text "BROTHER PRINTER SUPPORT" is written in large, bold, blue capital letters. Below this, the toll-free number "1-877-813-3087" is displayed in a red, cursive font. At the bottom center, a yellow button with a blue border contains the website address "http://brothercustomersupport.com". On the right side, there is a white silhouette of a person's head and shoulders, and a small image of a Brother wireless printer.

How to install Brother wireless printer without CD?

Wireless printers generally use CD to install drivers & printer software on the computers. But what will you do if you lose your installation CD? Well, no need to get worried as you can still install your printer in the most simplest way. In this article, we will describe how to install Brother Wireless printer without CD, just check out all steps carefully. And if you get stuck up anywhere during its installation process you can call up [Brother Printer Service Number](http://brothercustomersupport.com)

1. Using USB cable on Windows OS

- a.** Confirm that your Brother wireless printer is placed closer to your operating system. Actually, various printers come up with short USB cables and because of this problem arising while setting up direct communication between Brother printer and computer.
- b.** Ensure that the USB cable that you are using should fit into both ends i.e., one of its ends is connected to Brother printer and another end is connected to OS. If your Brother printer doesn't have any USB cable then you have to purchase a USB cable. Check Brother printer's model number is being followed by the "USB cable".
- c.** In the next step, click the printer's turn on button and then wait for a minute before proceeding further. After some time, you are prompted to begin printer installation. Just

follow on-screen instructions until Brother printer installation finishes. On the other hand, if printer installation doesn't begin then continue with this method.

d. Click onto Windows logo that is located on the bottom-left corner of the screen. By doing this, Start menu will be opened.

e. In the Start menu, type "Printer & Scanner". Once you find this, enter into Printers and Scanners section. At the "Printers & Scanner" windows, tap onto the option "Add a printer".

f. In the next step, click onto your printer's name. You can find out that this option in the "Add a printer" section by doing this, Brother printer installation will begin.

Once Brother printer installation complete, it will work appropriately.
